### Remarks

Evaluation of the sample according to BNN (Bundesverband Naturkost Naturwaren e.V.):  
 BNN adopted an orientation value for residues of plant protection products of 0.010 mg/kg on 3rd of April 2001.  
 No more than a total of two pesticides may be present as long as these are technically unavoidable contamination and there are no other indications for violation of relevant organic farming legislation.  
 This applies only to substances with a residue level above or equal to 0.010 mg/kg (laboratory result without adjustment for analytical variance, if applicable corrected with a processing factor).  
 This orientation value applies to the original unprocessed product.

No residues of plant treatment agents have been detected in the present sample.  
 The present sample meets the requirements of the BNN for organic products.

On the part of the BNN, regarding the orientation value, it is noted that irregularities and offense against existing rules and regulations for organic production only can be declared by the responsible inspection bodies and regulatory authorities.

#### Remark lead:

In the present sample lead was detected with a concentration of 0,51 mg/kg.  
 Taking into account a processing factor of 7 for dried mushrooms the above mentioned sample meets the provisions of Regulation (EG) No 1881/2006 in the actually valid version.

#### Marketability:

The above-named product meets according to the manner and extent of the presented testings the provisions of German Food Law. In this respect and in our opinion the product is marketable in Germany.

Start of testing: 26.11.2019  
 End of testing: 02.12.2019
